DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior office action.
2. The new grounds of rejection set forth below are necessitated by applicant's amendment filed on 12/26/2006. In particular, claim 14 is new. Thus, the following action is properly made final.

Claim Rejections - 35 USC § 112

3. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 is indefinite because the claim is to a composition, however, the body of the claim recites structural limitations which cannot be in a structureless composition. In the interest of compact prosecution, the limitation of "wherein the thin green sheet is laminated to form a several tens of layer thick stack" is read as intended use for the prior art rejection set forth below.

Claim Rejections - 35 USC § 103

4. Claims 2-5, 9, and 14 are rejected under 35 U.S.C. 103(a) as obvious over Simpson (US 4,379,109).

With respect to claims 1-5, the rejection is adequately set forth in paragraph of Office action mailed 7/24/2006 and is incorporated here by reference.

Art Unit: 1714

With respect to claim 14, the limitation is intended use. Case law holds that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

5. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Simpson (US 4,379,109) in view of Pieterse et al (US 5,268,415).

The rejection is adequately set forth in paragraph 6 of Office action mailed 7/24/2006 and is incorporated here by reference.

Response to Arguments

6. Applicant's arguments filed 12/26/2006 have been fully considered but they are not persuasive. Specifically, applicant argues (A) that Simpson fails to disclose, teach or suggest manufacturing the green sheet for MLCC and (B) that Simpson fails to teach the use of the relative low molecular weight polymer to increase the interlayer adhesive strength between the green sheet and internal electrodes.

With respect to argument (A), the examiner agrees, however, the claims are to a composition and not to MLCC. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Furthermore, while the structure is recited in the

Art Unit: 1714

preamble in the claim, a preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

With respect to argument (B), the examiner agrees, however, although Simpson uses the relative low molecular weight polymer in a different capacity than applicant (i.e., to decrease brittleness), case law holds that it “does not alter the conclusion that its use in a prior art composition would have been *prima facie* obvious from the purpose disclosed in the reference.” *In re Linter*, 458 F.2d 1013, 173 USPQ 560 (CCPA 1972).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1714

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
